REFRIGERATION Industrial

High efficiency for increased productivity
and lower operating costs.

ECO AR LINE

LEARN MORE

- Capacities from 3,000 kcal/h to 450,000 kcal/h
- Fixed scroll compressor for high efficiency.
- Brazed plate evaporator for improved heat exchange.
- High-performance finned microchannel condenser
- Axial exhaust fans for excellent air circulation.
- Environmentally friendly refrigerant, compliant with environmental standards.
- Easy-to-operate and precise PLC control system.
- Support for up to 4 fully independent circuits.
- Remote monitoring system for real-time control

HYBRID LINE

LEARN MORE

- Capacities between 35,000 kcal/h and 250,000 kcal/h
- 50% fixed scroll compressor and 50% variable scroll compressor
- Brazed plate evaporator that optimizes heat transfer.
- High-performance finned microchannel condenser.
- Axial exhaust fans for excellent air circulation.
- Environmentally friendly refrigerant, compliant with environmental standards.
- Easy-to-operate and precise PLC control system.
- Supports up to 4 fully independent circuits.
- Remote monitoring system for real-time control

ECO WATER LINE

LEARN MORE

- Capacities from 6,000 kcal/h to 150,000 kcal/h.
- Fixed scroll compressor for high efficiency.
- Brazed plate evaporator for better heat exchange.
- High-performance finned microchannel condenser.
- Axial exhaust fans for excellent air circulation.
- Environmentally friendly refrigerant, compliant with environmental standards.
- Easy-to-operate and precise PLC control system.
- Supports up to 4 fully independent circuits.
- Remote monitoring system for real-time control

PLATINUM LINE

LEARN MORE

- Capacities from 16,000 kcal/h to 480,000 kcal/h
- Variable scroll compressor with inverter technology
- Brazed plate evaporator that maximizes heat exchange.
- High-performance finned microchannel condenser
- Axial exhaust fans with variable speed control.
- Environmentally friendly refrigerant, compliant with environmental standards.
- Easy-to-operate and precise PLC control system.
- Supports up to 4 fully independent circuits.
- Remote monitoring system for real-time control

SCREW LINE

LEARN MORE

- Capacities from 200,000 kcal/h to 1,200,000 kcal/h
- High-performance screw compressor
- Brazed plate evaporator, optimizing heat exchange.
- High-performance finned microchannel condenser.
- Axial exhaust fans for excellent air circulation.
- Environmentally friendly refrigerant, compliant with environmental standards
- Easy-to-operate and precise PLC control system.
- Supports up to 4 fully independent circuits.
- Remote monitoring system for real-time control

TSM LINE

LEARN MORE

- Reinforced fiber structure for greater durability.
- Modular design for easy expansion and customization.
- Support for mounting up to 6 modules, expanding capacity.
- Automatic water dispenser for flow optimization.
- Efficient exhaust system for better ventilation.
- Injected polypropylene honeycomb, ensuring strength and performance.
- Exclusive maintenance window system for quick access.

LINE TR

LEARN MORE

- Temperature control and adjustment from +30°C to +90°C.
- Modern, compact and economical.
- Controllers with software for adjustments.
- Features an exclusive heating and cooling ramp.
- Exclusive heating elements.

LINE TS

LEARN MORE

- Reinforced fiber structure for greater strength and durability.
- Cylindrical structural design
- Automatic water dispenser for flow optimization.
- Efficient exhaust system for better ventilation.
- Injected polypropylene honeycomb structure, ensuring strength and performance.
- Exclusive maintenance window system for quick access.

COMPLETE CONTROL, WHEREVER YOU ARE. CONTROL CHILLER APPLICATION

To provide comprehensive monitoring of our customers' equipment performance, we developed the Control Chiller application. With it, you can access essential data in real time and remotely control various functions, ensuring faster decision-making, maximum operational efficiency, and greater profitability for your production process.

The Control Chiller app is available on Android and iOS platforms.
(Consult our sales team for more information.)

COMPLETE LINE OF PARTS AND ACCESSORIES.

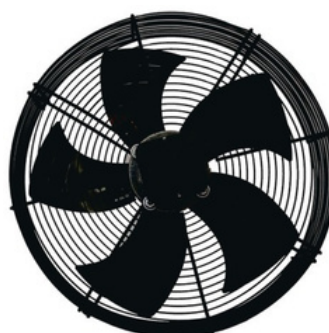

King's Refrigeração is our partner, offering a complete line of parts and accessories for industrial refrigeration systems, ensuring quick replacements and maximum efficiency in the maintenance of your equipment.
